EDUCATION

B.S. Computer Science **Spring 2019**
North Dakota State University Fargo, ND

- GPA: 3.9; *summa cum laude*

WORK EXPERIENCE

Software Quality Engineer **Aug 2023 - Present**
Open Systems International Medina, MN

- Maintain Jenkins and Python build system for power grid software test environments, improving build success rate from 75% across 3 environments to 98% across 4 environments.
- Find defects using multiple testing approaches: automated, manual, non-functional, and more.
- Won 1st place in company Hackathon for project using AI to identify solar panels in images.

Full Stack Developer **May 2019 - Nov 2022**
Voxtelesys Fargo, ND

- Developed customer and employee portals with Vue.js, Node.js, SQL, and Docker; reducing support calls and increasing resolution speed.
- Created Node.js/MongoDB/Elasticsearch ticketing system with email and calendar integration, enabling support team organization and communication.
- Created Electron desktop application to spin up and configure VMs, saving support team time.

Software Development Intern **May 2018 - Aug 2018**
Securian Financial Saint Paul, MN

- Developed employee web app in Java/JavaServer Pages/SQL to increase underwriter productivity.
- Wrote JUnit tests and refactored customer intake pipeline to improve maintainability.

PROJECTS

Personal Website *(quinnlas.com)* **2026**

- Personal website built with React, React Router, and Tailwind CSS.
- Built automatically with a Github Actions pipeline.

City Learner *(city.quinnlas.com)* **2026**

- React frontend visualizes streets in any city with custom CSS using the OpenStreetMap API.
- Express/Node.js backend hosted on a VPS with DNS and TLS/SSL configured.

SKILLS

Languages - JavaScript, Python, Java, HTML/CSS
Frameworks - Vue.js, React, React Router, Node.js, Express, Tailwind CSS, Electron, Pytest
Databases - MongoDB, Elasticsearch, SQL
Tooling - Jenkins, Git, GitHub Actions, Docker
